

## MSc Position in Gut Microbiology

We are seeking a highly qualified and motivated MSc graduate student to work on a research project titled “Modulation of human gut microbiota using psychobiotics” under supervision of Dr. Riadh Hammami. The laboratory is located at School of Nutrition Sciences (SNS), Faculty of Health Sciences of the University of Ottawa.

Applications from well-motivated Canadian and international candidates are welcomed. The candidate should hold a B.Sc. degree in microbiology, biology, biochemistry, or a related field. Previous exposure to and experience with basic microbiology and molecular biology techniques is an asset. Team-orientation and excellent communication skills are expected.

The MSc candidate will be employed for 2 years starting from September 2020. The successful candidate will run for an annual fellowship of \$18,000. Only candidate with strong academic records will be considered.

Please send a statement of research experience and career goals, a Curriculum Vitae, transcripts and contact information for two independent referees to [riadh.hammami@uottawa.ca](mailto:riadh.hammami@uottawa.ca)
